

# PHINITY

INTEGRATED RISK MANAGEMENT

Automating peace of mind

# VULNERABILITY REMEDiation MANAGEMENT

An information security vulnerability refers to areas where an organisation may be open to attack or damage. Vulnerabilities in an organisation's cybersecurity defences are typically pro-actively identified through the running of vulnerability scanning software, manual configuration assessments, vendor emergency fixes, or more in-depth penetration testing of infrastructure, networks, applications, etc.

Organisations actively perform vulnerability remediation management processes to address or minimise these risks.

## THE CHALLENGE

The prevalence of technology within organisations and the risk of cybersecurity have increased, so too has the volume of identified security vulnerabilities. Unfortunately, the processes following on from the reporting of these vulnerabilities have not kept pace, and as a result, most organisations have a growing list of unremediated vulnerabilities that could result in significant risks to the organisation. This is compounded by the fact that these reports often come from varying sources in varying formats to varying stakeholders – so the organisation does not have a single view of all the vulnerabilities and the potential risks.

Some of the key vulnerability remediation challenges that organisations experience include:

**Lack of process consistency and efficiency**

**Disparate sources of information**

**Complicated reporting channels**

**Lack of clear accountability and responsibility to remediate**

# THE SOLUTION

Phinity's Vulnerability Remediation Management solution automates the allocation, tracking and reporting of vulnerabilities from all sources so that the team can focus on closing vulnerabilities rather than on administering the process.

## INTEGRATING PHINITY INTO YOUR VULNERABILITY REMEDIATION EFFORTS HAS MANY BENEFITS:

DECREASED  
RISKS

DECREASED  
COSTS

INCREASED  
COLLABORATION

OPERATIONAL  
EFFICIENCIES

REAL-TIME  
REPORTING

**COLLATE, MANAGE, AND REMEDIATE VULNERABILITIES EFFECTIVELY AND EFFICIENTLY.**

## ABOUT PHINITY RISK SOLUTIONS

Globally and industry independent. Phinity Risk Solutions develops cloud applications for the information risk and governance market. The Phinity Risk Solutions platform integrates into your risk and compliance processes to help you decrease your risk exposure. Boost your risk management capability and manage your organisational risks, from identification through to remediation, with the help of our powerful solutions. Make informed decisions faster with our strong and relevant reporting based on your risk and compliance data.
