

PHINITY

INTEGRATED RISK MANAGEMENT

Automating peace of mind

CONTINUOUS COMPLIANCE

Knowing your compliance status for both internal policy/procedure compliance as well as external legislation/standards is achieved through continuous compliance.

Phinity supports a continuous compliance architecture ensuring your compliance requirements are digitised, and your processes are automated. This makes for a more straightforward, less disruptive, and complete view of your business' compliance. You will create visibility across all parts of the compliance management process, highlight non-compliance, reduce risk and strengthen your business posture. Non-compliance is a significant risk to every business.

THE CHALLENGE

Compliance can be complicated, expensive, and seem like a hindrance to business. Therefore, companies have often under-invested in this area. Under-investment is a risk in itself; however, it is exacerbated by the burden of growing compliance requirements from internal compliance, government, industry bodies and customers.

Compliance challenges will only increase. Companies that continue to invest in low tech and manual solutions will not keep up, and become non-compliant.

Non-Compliance

Cost Inefficiencies

Under-Investment

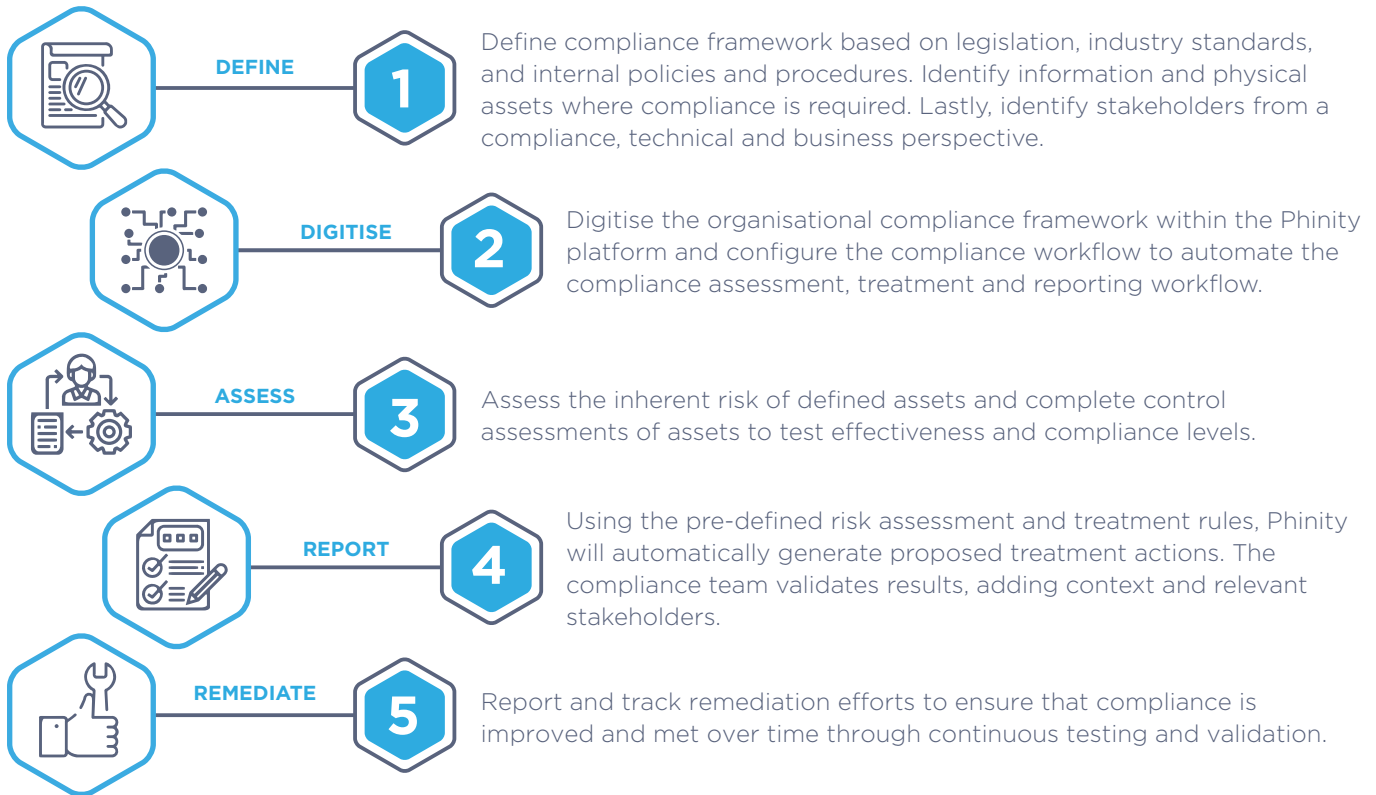

Manual Processes

THE SOLUTION

Phinity supports continuous compliance by integrating into your manual control processes, automating them through our Robotic Process Automation (RPA) capability, driving efficiencies, creating visual decision support, and higher levels of compliance.

START

Ensure your business stays ahead of the pack and does not get held back through inefficiencies.

STREAMLINE THE COMPLIANCE MANAGEMENT PROCESS
